3M™ Stainless Steel Cleaner and Protector

Save time and money.*

With the ability to spot clean, 3M™ Stainless Steel Cleaner and Protector, allows you to use less product and save up to 80% of your time compared to a leading solution.**

Complies with the Green Seal™ Standard for Specialty Cleaning Products for Household Use (GS-52) and the Green Seal Standard for Specialty Cleaning Products for Industrial and Institutional Use (GS-53).

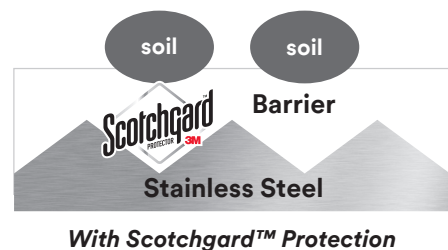

* Reduces time needed to clean stainless steel surfaces and allows spot cleaning of stainless steel.

** Tests based on internal study done at 3M against competitive product.

3M™ Stainless Steel Cleaner and Protector leaves a transparent barrier of Scotchgard™ Protection between your surface and soil and oily residue. With repeated use, this barrier can help protect against surface corrosion and prevent soils and oily residue from sticking to stainless steel as compared to leading polishes.

The oil-free formula means better protection and longer-lasting shine. Oil attracts dust, dirt and lint. It can be tough to remove and, over time, darkens and dulls the look of stainless steel. 3M™ Stainless Steel Cleaner and Protector helps prevent this darkening and dulling from even starting.

Degrease first.

For best results, we recommend using a heavy-duty multi-surface cleaner or degreaser before applying 3M™ Stainless Steel Cleaner and Protector for the first time.
