

400

Heavy duty hand cleaner with abrasive

TECHNICAL DATA SHEET

DESCRIPTION

400 is a heavy duty hand cleaner which combines the natural solvent power of mineral spirits and the emulsifying properties of surfactants to effectively breakdown grease and oil based dirt which are commonly associated with industrial process and vehicles or industrial equipment maintenance.

400 contains a medium pumice abrasive for gentle scrubbing, acting to quickly dislodge grime and dirt from hands. It effectively removes grease, varnish, lacquer, printer's ink, tar, carbon, pine tar, rust, asphalt, graphite, putty, dyes, resins, urethanes, adhesives and certain paints. It is formulated to be used with water but is equally effective as a waterless hand cleaner.

400 is enriched with special emollients to prevent skin from drying after repeated use.

400 can be used in industrial plants, garages, service stations and janitorial washroom facilities, etc.

400 is effective in hard or soft water.

DIRECTIONS FOR USE

Wet skin, apply a sufficient amount of **400** on hands and rub briskly. **400** will liquefy, thus remove all dirt. Wipe hands with a paper towel or dry cloth or rinse with tap water.

Repeat if necessary.

Consult a GILCO representative for more information.

PROPERTIES

Appearance :	Pasty
pH (1% solution) :	~7.0
Solubility :	Easy
Fragrance :	Green apple 10588
Color	Green
