

Flush

Heavy Duty Liquid Toilet Bowl & Urinal Cleaner (acid base)

TECHNICAL DATA SHEET

DESCRIPTION

FLUSH is a unique blend of acids and surfactants, working together to quickly and effectively descale and dissolve lime-scale, uric acid crystals, water stains, rust, dirt, grime and germs.

FLUSH is a heavy duty cleaner which removes, through chemical reaction, hard mineral deposits, soap scum and urine salts leaving toilet bowls, urinals and porcelain sinks sparkling clean and sanitized.

Fully inhibited to prevent corrosion, **FLUSH** is ideally designed for application and rinsing. Excellent for weekly use, for it is harmless to all plumbing and septic systems. It cleans as it deodorizes in a single treatment leaving a pleasant almond scent to restrooms.

DIRECTIONS FOR USE

TO CLEAN TOILET BOWLS: reduce water level by forcing it over the trap with a swab. Holding mop over bowl, pour 60 ml of **FLUSH** onto bowl mop and swab entire bowl; especially the areas under flushing. Allow **FLUSH** 5 minutes to work. Flush toilet and rinse out mop.

TO CLEAN URINALS: remove screen or strainer, saturate bowl mop with **FLUSH** and wet entire surface. Pour 60 ml around outlet and into drain opening. Allow **FLUSH** 5 minutes to work. Swab all surfaces and openings until clean and deodorized. Replace screen or strainer and flush unit and rinse out mop.

STORAGE: Avoid frost or excessive heat.

DO NOT USE ON SINKS, BATHTUBS OR ANY ENAMELLED SURFACES.

Consult a GILCO representative for more information.

PROPERTIES

Appearance :	Liquid
pH (1% solution) :	~1.0
Solubility :	Instant
Fragrance :	Almond
Color	White
