Specific hazards arising from the chemical May include and are not limited to: Chlorine; Hydrogen chloride gas; Oxygen; Sodium dioxides.

Special protective actions for fire-fighters. Firefighter should wear proper protective equipment and self contained breathing apparatus with full face piece operated in positive pressure mode. Move containers from fire area if safe to do so. Use water to cool fire exposed containers.

SECTION 06: ACCIDENTAL RELEASE MEASURES

Personnal precautions..... Restrict access to area until completion of clean up. Evacuate personnel to safe areas. All persons dealing with clean up should wear the appropriate protective equipment including self contained breathing apparatus. Use personnel protective equipment. Avoid breathing vapours, mist or gas. Ensure adequate ventilation.

Environmental precautions..... Ensure spilled product does not enter drains, sewers, waterways, or confined spaces. If necessary, dike well ahead of the spill to prevent runoff into drains, sewers, or any natural waterway or drinking supply. Prevent further leakage or spillage if safe to do.

Methods and materials for containment and cleaning Contain and absorb spilled liquid with non combustible, inert absorbent material (e.g. sand), then place absorbent material into a container for later disposal. Flush with water. Do not flush into surface water or sanitary sewer system. Contaminated absorbent material may pose the same hazards as the spilled product. Notify the appropriate authorities as required.
