

Polar

Concentrated Glass & Windows Cleaner

TECHNICAL DATA SHEET

DESCRIPTION

POLAR is an “ammonia free”, highly concentrated glass and window cleaner that works efficiently at very low temperatures on hard surfaces such as: windows, windshields, tiles, aluminum, chromed and enameled metals, stainless steel, and much more.

POLAR glass cleaner has been developed with a blend of special solvents that work instantly to cut through grease, smoke film, fingerprints, grime and window film, leaving surfaces sparkling clean and streak free. Providing glass, windows, and windshields with a superb clarity.

POLAR is a fast effective cleaner which contains methylated spirits for a fast drying effect that makes the job quicker, reducing time and labor costs.

DIRECTIONS FOR USE

Spray **POLAR** on and wipe off with a cloth, paper towel or a squeegee.

For applications over -25°C, dilute 1 part **POLAR** in 3 parts water.

For applications under -25°C, dilute 1 part **POLAR** in 2 parts water.

Consult a GILCO representative for more information.
