

Pino-Sol

Pine Oil Disinfecting Floor Cleaner

TECHNICAL DATA SHEET

DESCRIPTION

PINO-SOL is the perfect solution for the cleaning of vinyl, ceramic, wood and concrete floors, walls, unprotected metal, painted and all other hard and washable surfaces, because it leaves them clean, streak free and shiny.

PINO-SOL penetrating agents cut dirt and grease, while its water soluble solvents provide a high level of surface activity, capable of emulsifying a wide range of soils and hydrocarbon based grease for a deep powerful synergic cleaning. **PINO-SOL** sequestering and dispersing agents will prevent soil particles from settling back on cleaned surfaces until rinsed away by clear water and avoid the formation of hard water deposit.

Pine oil confers **PINO-SOL** purifying and deodorizing properties that make it the ideal detergent for bathroom floors and walls, garbage and trash cans and trucks, leaving them with a very pleasant fresh pine aroma.

DIRECTIONS FOR USE

PINO-SOL can be applied with a floor cleaning machine or manually with a brush, a sponge or a mop.

Light cleaning on walls, floors, tables, chairs, etc. Use **PINO-SOL** diluted at a concentration ranging from 60ml to 80ml in 4L of water at a temperature between 40-60°C (105-140°F). Rinse surfaces with potable water.

General cleaning on walls, floors, tables, chairs, etc. Use **PINO-SOL** diluted at a concentration ranging from 100 ml to 125 ml in 4L of water at a temperature between 40-60°C (105-140°F). Rinse surfaces with potable water.

Deep cleaning like oils and greases on floors, machinery bases, platforms. Use **PINO-SOL** diluted with water at a concentration ranging from 150 ml to 195 ml in 4L of water at a temperature between 50-70°C (120-160°F).

Rinse surfaces with potable water.

Consult a GILCO representative for more information.

PROPERTIES

Appearance :	Viscous translucent liquid
pH (1% solution) :	~8.5
Solubility :	Instant
Odor :	Pine
Color	Brownish Yellow

PRECAUTIONS

PACKAGING CODE

4 L
 4 x 4 L
 20 L
 210 L

Do not use on food contact surfaces. Do not store in food processing or food storage areas. Do not contaminate food products.

ALL SURFACES SUBJECT TO CONTACT WITH FOOD MUST BE RINSED WITH POTABLE WATER BEFORE USE
