

## Solu-Drain

**Solu-Drain** is a biotechnological and readily biodegradable product containing micro-organisms and surfactants. The micro-organisms contained in **Solu-Drain** have been specially selected to accelerate the biodegradation of fats, oils and grease accumulated in drains and pipes.

**Solu-Drain** is user friendly. A simple dilution is required. You just have to pour the diluted solution directly in sinks and floor drains to be treated.

**Solu-Drain** is used in hotels and restaurants, hospitals, commercial kitchens and food processing industry.

For best results, make sure drains and pipes are clean before the first application of **Solu-Drain**.

### Characteristics:

<b>Form:</b>	liquid
<b>Colour:</b>	blue
<b>Fragrance:</b>	fresh
<b>Content:</b>	bactéria and surfactants

**Solu-Drain** is safe and user-friendly, when used as directed. Do not contain corrosive or caustic products. It is **Certified EcoLogo** and **Tested in laboratory**. It will not damage ceramics, metals, and plastics.

## BENEFITS

- Speed up biodegradation of oils and grease
- Leaves a protective film in pipes
- Effectively eliminates unpleasant odours
- Reduces maintenance costs of the piping
- Safe for the user and will not damage metals, ceramics or plastics
- A better option than chemical products
- Environmentally certified and Tested in laboratory
