#### **SECTION 3 - HAZARDS IDENTIFICATION**

### **Emergency Overview**

Yellow powder. Lemon odor. DANGER! Corrosive liquid. Causes eye and skin irritation or burn. May cause headache, nausea, dizziness and other central nervous system effects.

## **\*POTENTIAL HEALTH EFFECTS\***

**Primary entry route(s):** Skin contact, skin absorption, eye contact, ingestion and inhalation.

#### Effects of short-term (acute) exposure:

*Inhalation:* May cause irritation to the nose, throat, respiratory tract and central nervous system depression. Symptoms may include headache, nausea, vomiting, loss of coordination and other central nervous system effects.

*Skin:* Direct skin contact may cause moderate to severe irritation or burn.

*Eye:* Direct eye contact may cause moderate eye irritation or burn. Symptoms may include redness, stinging, tearing and pain.

*Ingestion:* Ingestion may cause irritation or burn to the mouth, throat and stomach. Symptoms may include dizziness, drowsiness, nausea, headache and other central nervous system effects.

# Effects of long-term (chronic) exposure:

Prolonged or repeated contact may cause drying, cracking and defatting of the skin (dermatitis).

#### Other important hazards:

Refer to Section 11, Toxicological Information, for further information.

### **SECTION 4 - FIRST AID MEASURES**

#### Inhalation:

Remove source of contamination or have victim move to fresh air. If not breathing, give artificial respiration. Obtain medical attention immediately.

#### Skin contact:

Wash contaminated area with running water for at least 20 minutes, while removing contaminated clothing. Obtain medical attention. Wash contaminated clothing before re-use.

#### Eye contact:

Immediately flush the contaminated eye(s) with gently flowing water for at least 20 minutes. Obtain medical attention.

#### **Ingestion:**

NEVER give anything by mouth if victim is rapidly losing consciousness, is unconscious or convulsing. Rinse mouth thoroughly with water. DO NOT INDUCE VOMITING. Have victim drink two glasses of water. If vomiting occurs naturally, have victim lean forward to reduce risk of aspiration. Repeat administration of water. Obtain medical attention immediately.

### **SECTION 5 - FIRE FIGHTING MEASURES**

#### Fire hazards/conditions of flammability:

Material will ignite when exposed to temperatures above the flash point.

**Flash point (Method):** > 93.3 °C

Lower flammable limit (% by volume): N/Av

**Upper flammable limit (% by volume):** N/Av

Sensitivity to mechanical impact: Probably not sensitive.

Sensitivity to static discharge: Probably not sensitive. N/Av

Auto-ignition temperature:

# Suitable extinguishing media:

Carbon dioxide, dry chemical powder and appropriate foam.

### Special fire-fighting procedures/equipment:

During a fire, irritating/toxic smoke and fumes may be generated. Do not enter fire area without proper protection. Firefighters should wear proper protective equipment and self-contained breathing apparatus with full facepiece. Shield personnel to protect from venting, rupturing or bursting cans. Move containers from fire area if it can be done without risk. Water spray may be useful in cooling equipment and cans exposed to heat and flame.

Hazardous combustion products: Carbon oxides and other irritating fumes and smoke.

#### **SECTION 6 - ACCIDENTAL RELEASE MEASURES**

#### **Personal precautions:**

Restrict access to area until completion of clean-up. Ensure clean-up is conducted by trained personnel only. Remove all ignition sources. Remove or isolate flammable and combustible materials. All persons dealing with clean-up should wear the appropriate protective equipment (See Section 8).

### Spill response/Cleanup:

Ventilate area of release. Eliminate all sources of ignition. Stop the leak if it can be done safely. Contain and absorb any spilled liquid concentrate with inert absorbent material, then place material into a container for later disposal (see Section 13). Contaminated absorbent material may pose the same hazards as the spilled product. Notify the appropriate authorities as required.

# **Environmental precautions:**

Confine spill, preventing it from entering sewer lines or waterways. Dispose of as per local, provincial and federal regulations.

# SECTION 7 - HANDLING AND STORAGE

## Safe handling procedures:

Before handling, it is very important that engineering controls are operating, and that protective equipment requirements and personal hygiene measures are being followed. People working with this chemical should be properly trained regarding its hazards and its safe use. Do not use near welding operations, flames or hot surfaces. Handling equipment should be properly grounded. Inspect containers for leaks before handling. Label containers appropriately. Ensure proper ventilation. Avoid breathing vapours or mists. Avoid contact with eyes, skin and clothing. Keep away from heat, sparks and flame. Avoid generating high concentrations of vapours or mists. Keep away from incompatible materials such as strong oxidizing materials. Keep containers closed when not in use. Assume that empty containers contain residues which are hazardous.

#### **Storage requirements:**

Store in a cool, well-ventilated area, away from heat and ignition sources. Store away from incompatible materials. Inspect all incoming containers to make sure they are properly labelled and not damaged. Storage area should be clearly identified, clear of obstruction and accessible only to trained personnel. Inspect periodically for damage or leaks.

#### Incompatible materials:

STRONG OXIDIZING MATERIALS (e.g. Chlorides, Peroxides), strong acids, some metals.

#### SECTION 8 - EXPOSURE CONTROLS AND PERSONAL PROTECTION

**Exposure limits:** There is no available data for the product. See below for individual ingredient exposure limits.

# \* See Section 2.

#### **Engineering controls:**

Use under well-ventilated conditions. Local exhaust ventilation system is recommended to maintain concentrations of contaminants below exposure limits.

#### **Respiratory Protection:**

Respiratory protection is required if the concentrations are higher than the exposure limits. Use a NIOSH approved respirators if the exposure limits are unknown.

#### **Protective Clothing/Equipment:**

Chemically protective gloves (impervious) and other protective clothing, to prevent prolonged or repeated skin contact, must be worn during all handling operations. Wear protective chemical splash goggles to prevent mists from entering the eyes. Make emergency eyewash stations, safety/quick-drench showers and washing facilities available in work area.

#### **General Hygiene Considerations:**

Avoid generating high concentrations of vapours or mists. Avoid contact with skin and eyes. Avoid breathing vapours or mists. Never eat, drink or smoke in work areas. Practice good personal hygiene after using this material. Remove and wash contaminated work clothing before re-use.
